Q: What should I prepare before execute Demo or edit Example?
A: Require first to install "BeauGauge Control Trial". Download link
http://www.beaugauge.com/en/downloadctrltrial.html

Q: I have installed "BeauGauge Control Trial", but still cannot execute Demo and edit Example, how to do?
A: If this Demo cannot be executed or has some issues on running, it is probably the BeauGauge Control Trial you have installed is not a latest version. Please uninstall first, then install latest version of BeauGauge Control Trial.
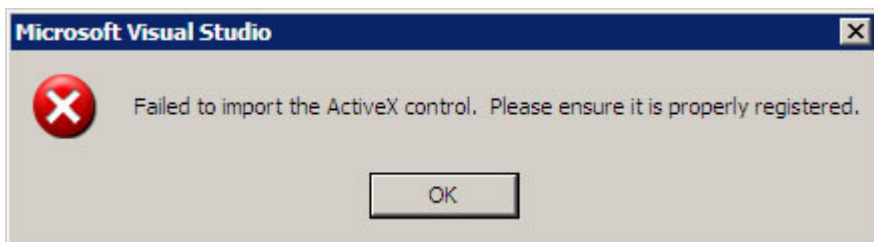

Q: In VB.NET project, after insert Control to a Form, it pops up the following dialog, how to fix?

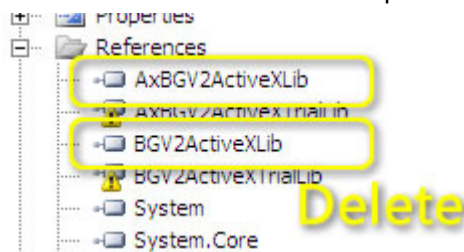

A: This issue is caused by upgrade of BeauGauge ActiveX Control. To fix it, you should delete those reference in "References" under "[your project] Properties" menu (see below).

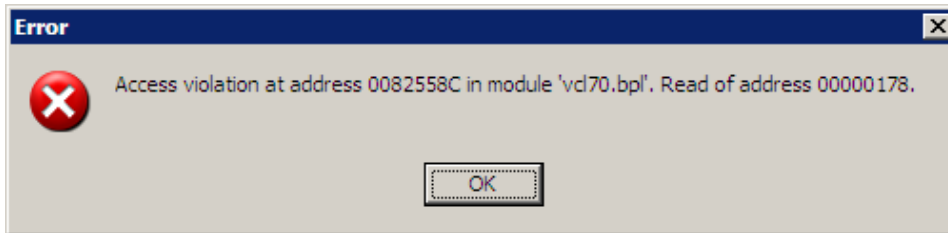

Q: In C# project, after insert Control to a Form, it pops up the following dialog, how to fix?

A: This issue is caused by upgrade of BeauGauge ActiveX Control. To fix it, you should delete those reference under "References" in "Solution Explorer" window (see below).
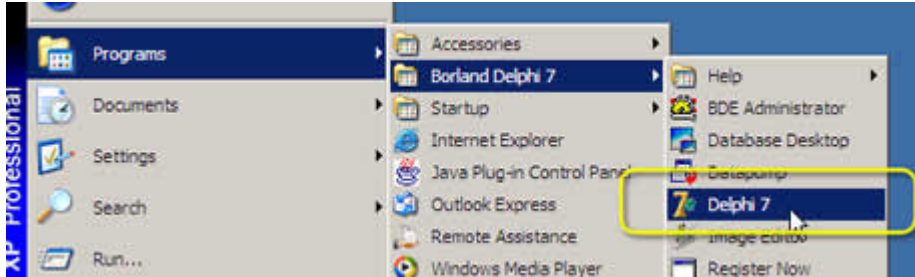

**Q: Open a Delphi project and pop-up the following error, how to solve it?**

A: It requires to import BeauGauge ActiveX Control, please refer to following steps.
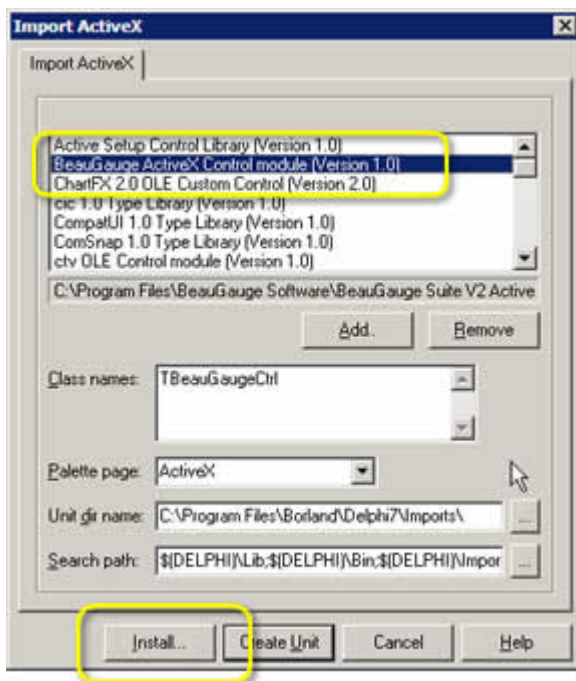

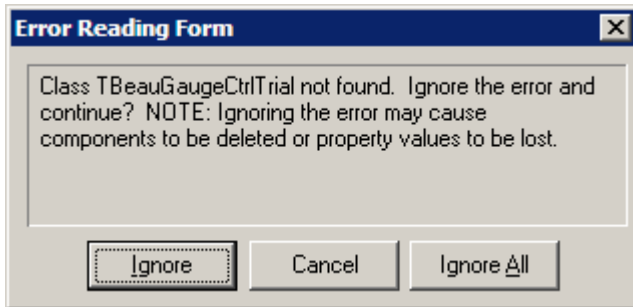

1. Launch Borland Delphi.

2. Select "Import ActiveX Control...".

3. In "Import ActiveX" dialog, select "BeauGauge ActiveX Control module" and click "Install..." button.

Q: Open a C++ Builder project and pop-up the following error, how to solve it?

Error Reading Form

Class TBeauGaugeCtrlTrial not found. Ignore the error and continue? NOTE: Ignoring the error may cause components to be deleted or property values to be lost.

[Ignore]   [Cancel]   [Ignore All]

A: It requires to import BeauGauge ActiveX Control, please refer to following steps.

1. Launch Borland C++Builder 6.

2. Select "Import ActiveX Control...".

3. In "Import ActiveX" dialog, select "BeauGauge ActiveX Control module" and click "Install..." button.
